

DI\_# = Digital INPUT Line #  
DO\_# = Digital OUTPUT Line #

### Zero Cut Scenario

- PC sends request to Puffer Arduino to set DO\_1 to HIGH
- Leica Arduino detects DI\_1 -> HIGH
- Leica Arduino sets DO\_1 -> LOW
- Leica Arduino uses mouse automation to set Leica in zero cut state.
- Leica Arduino sets DO\_1 -> HIGH
- Puffer Arduino detects DI\_1 -> HIGH and notifies PC by serial message.
- PC receives message that DI\_1 is HIGH
- PC request Puffer Arduino to set DO\_1 -> LOW
